Abazar Adam

Software Engineer | Cybersecurity Engineer

abazeradamwork@gmail.com | +60 17-580 3025 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer Science (Cybersecurity) student at Multimedia University with hands-on experience in full-stack and mobile development, application security, and AI-assisted tools. Skilled in Java, Spring Boot, React, REST API development, authentication and access control, secure coding, and software testing. Founder of EvoTech, delivering software solutions and technical services to 50+ clients.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, Bash
Development: Spring Boot, React, React Native, FastAPI, Flask, REST APIs, Object-Oriented Programming, SDLC
Tools & Databases: Git, Docker, Linux, MySQL, PostgreSQL, JUnit, Mockito
Cybersecurity: OWASP, Ethical Hacking, Penetration Testing, Vulnerability Assessment, Secure Coding, JWT, RBAC
Engineering: Unit Testing, Debugging, CI/CD Fundamentals, Cloud Deployment, AI Integration

EXPERIENCE

Penril Datability (M) Sdn Bhd *2026*
Software Engineering Intern

- Built a full-stack banking application using Spring Boot, React, and MySQL, implementing REST APIs, JWT authentication, role-based access control, account management, and transactional transfers.
- Developed a React Native mobile application integrated with the backend API, implementing authentication, account views, transaction history, transfers, and profile features.
- Conducted authorized penetration testing and security hardening, addressing access-control issues, unsafe file handling, security misconfigurations, and dependency vulnerabilities.
- Contributed to an internal AI-assisted log analysis tool, developing log-processing workflows, frontend/backend integration, AI analysis features, and application testing.
- Implemented service-layer unit tests using JUnit and Mockito and improved error handling, configuration, and technical documentation.

EvoTech *2024*
Founder & Technical Lead

- Delivered software solutions, websites, automation systems, and IT services to 50+ clients.
- Managed requirements, development, testing, deployment, and maintenance while leading technical decisions and client collaboration.

Fawrico Platform *2026*
Cybersecurity Consultant & QA

- Performed security assessments, vulnerability analysis, quality assurance, and platform validation.
- Collaborated with developers to improve application reliability, functionality, and security.

SELECTED PROJECTS

CyberThreatX – SOC Platform

- Built a Flask-based SOC platform with real-time log ingestion, Sigma detections, role-based access control, alert triage, threat intelligence, and anomaly-detection workflows.

ReconMaster – Reconnaissance Framework

- Developed a modular FastAPI framework using AsyncIO, Playwright, and Nmap integration, with structured reporting and rate-limiting controls.

CyberGuardX – Security Assessment Platform

- Built security tools for phishing URL detection, breach analysis, password assessment, and OWASP vulnerability scanning with remediation reports.

EDUCATION

B.Comp.Sc. (Hons.) in Cybersecurity *2023–2027*
Multimedia University (MMU), Malaysia Dean's List Award, 2025
Relevant Coursework: Ethical Hacking and Penetration Testing, Cybersecurity Fundamentals, Network Security, Cryptography and Data Security, Software Engineering Fundamentals, Object-Oriented Programming and Data Structures, Algorithm Design and Analysis, Database Fundamentals, Computer Networks.

CERTIFICATIONS & LANGUAGES

Certifications: Fortinet Certified Associate in Cybersecurity; FortiGate 7.6 Operator; Cisco Ethical Hacker; Cisco Cyber Threat Management; Cisco Network Defense

Languages: Arabic (Native), English (Fluent), Spanish (Beginner)
