PROFESSIONAL SUMMARY

Cybersecurity Engineer and Security Analyst with hands-on experience in penetration testing, vulnerability assessment, threat detection, and incident response. Strong foundation in network security, SIEM monitoring, and offensive security methodologies aligned with OWASP Top 10 and MITRE ATT&CK framework. Founder of EvoTech, delivering secure infrastructure solutions and mitigating real-world phishing and social engineering attacks. Currently pursuing CompTIA Security+ (SY0-701) and ISC2 Certified in Cybersecurity (CC).

TECHNICAL SKILLS

Security Tools: Kali Linux, Nmap, Wireshark, Burp Suite, OWASP ZAP, Metasploit, Splunk, IBM QRadar

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK, NIST Cybersecurity Framework, ISO 27001 Concepts

Programming & Scripting: Python (Security Automation), Bash, C/C++, SQL, Basic Assembly

Cloud & Infrastructure: AWS Fundamentals, Docker, Git, CI/CD Concepts, Linux (Debian/RedHat), Windows Server, Active Directory

PROFESSIONAL EXPERIENCE

CyberThreatX (v1.0) — SOC-in-a-Box Platform

2026

- Engineered lightweight SOC platform with real-time log ingestion, Sigma-based detection, and ML anomaly scoring.
- Built Flask dashboard with alert triage, RBAC, correlation engine, and threat intelligence enrichment.
- Containerized the platform using Docker for scalable and production-ready deployment.

ReconMaster — Advanced Reconnaissance Framework

2026

- Developed modular automated reconnaissance framework with parallel subdomain enumeration and service discovery.
- Integrated Nmap scanning, HTTP service detection, and cloud bucket enumeration with structured reporting.
- Designed scalable async architecture using FastAPI, Asyncio, and Playwright with stealth controls (proxy rotation, rate limiting).

CyberGuardX — Project Lead & Developer

2026

- Developed web-based security assessment platform simulating real-world penetration testing workflows.
- Built Email Breach Detection module cross-referencing compromised credential datasets.
- Implemented Machine Learning-based Phishing URL Detection system.
- Designed Password Strength Analyzer using entropy-based risk scoring.
- Created automated OWASP Top 10 vulnerability scanner with risk prioritization and remediation guidance.
- Generated structured security reports aligned with industry best practices.

EvoTech — Founder & Technical Lead

2024

- Delivered secure web applications and IT infrastructure to 50+ clients.
- Reduced vulnerability exposure through secure SDLC and security hardening practices.
- Detected and mitigated phishing campaigns and social engineering threats.
- Managed remote cross-functional technical teams and project deployments.

Security Research & Lab Simulation

2025 – Present

- Conducted simulated penetration testing in controlled lab environments.
- Performed network traffic analysis and anomaly detection using Wireshark.
- Executed vulnerability scanning and exploitation using Metasploit framework.
- Practiced OSINT investigations and attack surface mapping techniques.

EDUCATION

Bachelor of Computer Science (Hons.) – Cybersecurity

2023 – Present

Multimedia University (MMU), Malaysia

Dean's List Award

2025

CORE SKILLS

Penetration Testing • Vulnerability Assessment • Threat Hunting • Incident Response • SIEM Monitoring • Log Analysis • Network Security • Risk Assessment • Access Control • Cloud Security • Security Auditing • Red Team Operations • Blue Team Operations • SOC Operations • Phishing Detection • Security Automation • Software Engineering

CERTIFICATIONS

Fortinet Endorsed Associate in Cybersecurity

Fortinet Certified Fundamentals – Cybersecurity (NSE Track)

FortiGate 7.6 Operator Certification

Cisco Networking Academy – Accredited Ethical Hacker

Currently Pursuing: CompTIA Security+ (SY0-701) and ISC2 Certified in Cybersecurity (CC)

LANGUAGES

Arabic (Native)

English (Fluent)

Spanish (Beginner)
