

Abazar Adam

Cybersecurity Engineer — Software Engineer

Qatar - Malaysia

Email: abazeradamwork@gmail.com

Phone: +60 11-2888 5466

GitHub: github.com/AbazarAdam

PROFESSIONAL SUMMARY

Cybersecurity Engineer and Security Analyst with hands-on experience in penetration testing, threat detection, SOC operations, and offensive security automation. Proven experience building full-stack security platforms including reconnaissance frameworks and SOC-in-a-Box monitoring systems. Strong foundation in OWASP Top 10, MITRE ATT&CK, SIEM engineering, and secure infrastructure design. Founder of EvoTech delivering secure systems and mitigating real-world phishing attacks.

CORE SKILLS

Penetration Testing • Reconnaissance Automation • Threat Hunting • Incident Response • SOC Operations • SIEM Engineering • Log Analysis • Vulnerability Assessment • Phishing Detection • Security Automation • Red Team Operations • Blue Team Operations • Risk Assessment • Cloud Security

TECHNICAL SKILLS

Security Tools: Kali Linux, Nmap, Wireshark, Burp Suite, OWASP ZAP, Metasploit, Splunk, IBM QRadar

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK, NIST Cybersecurity Framework, ISO 27001 Concepts, Sigma Rules

Programming & Scripting: Python (Advanced Security Automation), Bash, C/C++, SQL, JavaScript

Backend & Web: FastAPI, Flask, REST APIs, Bootstrap 5

Cloud & Infrastructure: AWS Fundamentals, Docker, Git, CI/CD Concepts, Linux (Debian/RedHat), Windows Server, Active Directory

PROFESSIONAL EXPERIENCE

CyberThreatX (v1.0) — SOC-in-a-Box Platform

2026

- Engineered lightweight SOC platform with real-time log ingestion, Sigma-based detection, and ML anomaly scoring.
- Built Flask dashboard with alert triage, RBAC, correlation engine, and threat intelligence enrichment.
- Containerized the platform using Docker for scalable and production-ready deployment.

ReconMaster — Advanced Reconnaissance Framework

2026

- Developed modular automated reconnaissance framework with parallel subdomain enumeration and service discovery.
- Integrated Nmap scanning, HTTP service detection, and cloud bucket enumeration with structured reporting.
- Designed scalable async architecture using FastAPI, Asyncio, and Playwright with stealth controls (proxy rotation, rate limiting).

CyberGuardX — Security Assessment Platform

2026

- Developed web-based security assessment platform simulating penetration testing workflows.
- Built Email Breach Detection and ML-based Phishing URL Detection modules.
- Designed Password Strength Analyzer with entropy-based risk scoring and automated OWASP reporting.

EvoTech — Founder & Technical Lead

2024

- Delivered secure web applications and IT infrastructure to 50+ clients.
- Reduced vulnerability exposure through secure SDLC and system hardening.
- Detected and mitigated phishing and social engineering attacks.
- Managed remote technical teams and deployments.

Security Research & Lab Simulation

2025 – Present

- Conducted controlled penetration testing and exploitation labs.
- Performed network traffic analysis using Wireshark.
- Practiced OSINT investigations and attack surface mapping.

EDUCATION

Bachelor of Computer Science (Hons.) – Cybersecurity

2023 – Present

Multimedia University (MMU), Malaysia

Dean's List Award

2025

CERTIFICATIONS

Fortinet Certified Associate in Cybersecurity

Fortinet Certified Fundamentals – Cybersecurity (NSE Track)

FortiGate 7.6 Operator Certification

Cisco Networking Academy – Ethical Hacker

Currently Pursuing: CompTIA Security+ (SY0-701) and ISC2 Certified in Cybersecurity (CC)

LANGUAGES

Arabic (Native)

English (Fluent)

Spanish (Beginner)
