

Abazar Adam

Cybersecurity Engineering & Security Analysis
abazeradamwork@gmail.com | +60 11-2888 5466

Professional Summary

Cybersecurity Engineering Student | Security Analyst (Entry-Level) with strong **red-team and offensive security interests**, hands-on **Kali Linux lab experience**, and a growing **industry-recognized certification track**. Demonstrated capability in **penetration testing, web application security, vulnerability assessment, and social engineering awareness**, complemented by foundational **blue-team and defensive security knowledge**. Founder of EvoTech with real-world experience managing clients, securing digital assets, and mitigating phishing and social engineering threats. Actively preparing for **CompTIA Security+** and pursuing a career as a Cybersecurity Engineer.

Education

Bachelor of Computer Science (Hons.) – Cybersecurity
Multimedia University (MMU), Malaysia | *2023 – Present*

- Focus Areas: Red-team techniques, penetration testing methodologies, social engineering, security analysis, virtualization-based security labs, and blue-team fundamentals.
 - **Dean's List Award – 2025**
-

Certifications & Professional Training

- Fortinet Certified Associate in Cybersecurity
- Cisco Networking Academy – Ethical Hacker
- Fortinet Certified Fundamentals – Cybersecurity (NSE Fundamentals Track)
- Getting Started in Cybersecurity 3.0
- Introduction to the Threat Landscape 3.0
- Technical Introduction to Cybersecurity 3.0
- HP LIFE Certification – Marketing Benefits vs. Product Features
- HP LIFE Certification – Data Presentation
- HP LIFE Certification – Effective Website Design

In Progress: - CompTIA Security+ (SY0-701) - Exploration of ISC2 Entry-Level Cybersecurity Certifications

Technical Skills & Security Competencies

Security Domains: Network Security, Web Application Security, Vulnerability Management, Threat Analysis, Security Awareness.

Offensive Security & Red Team

- Penetration testing workflows, vulnerability discovery, and exploitation for **web and network environments**.
- Familiarity with **Active Directory attack concepts**, credential harvesting, privilege escalation, and lateral movement fundamentals.
- Exposure to **phishing frameworks**, phone-based attack concepts, and social engineering techniques (for ethical research and defense awareness).

Web & Application Security

- OWASP-based testing methodologies and bug-hunting workflows.
- Web vulnerability analysis using Kali Linux toolsets.
- Concept development for **HexStrike** – a beginner-friendly, all-in-one website security testing platform integrating Kali tools and bug bounty workflows.

Defensive Security & Blue Team Fundamentals

- Endpoint security fundamentals: access control, encryption, data loss prevention (DLP), and system hardening.
- Introductory knowledge of **SOAR concepts**, security monitoring use cases, and defensive visualization tools.

Security Tools (Kali Linux)

- OWASP ZAP / Burp Suite
- WPScan / Subfinder / FFUF
- SQLMap / Nmap /
- XSSer / Whatweb
- Netcat / Metasploit
- Qradar / Splunk
- Additional common penetration testing and reconnaissance utilities

Virtualization & Lab Environments

- Built and maintained **Kali Linux virtual machines** and server-based labs.
 - Hands-on lab practice supporting red-team focused academic projects and personal research.
-

Programming & Scripting

- **Python** (automation, security scripting)
 - **Java**
 - **C / C++**
 - **SQL**
 - **Assembly**
 - **Bash** scripting for security labs and automation
-

Development & Automation Exposure

- Spring Boot (API security exposure)
 - Python libraries (scikit-learn, PyTorch)
-

Tools & Technologies

- AWS
 - Docker
 - Git
 - REST APIs & GraphQL
 - Firebase
 - Jira
 - Confluence
 - MCP Server
-

Operating Systems

- Linux
 - Windows
-

Work Experience & Projects

EvoTech – Founder / Co-Founder (Virtual Company)

- Founded and managed a multi-service tech startup delivering **web and application development**, IT services, digital marketing, social media management, and feasibility studies.
- Worked with **50+ clients based in Qatar**, providing technical consulting and implementing **security awareness and protection against phishing and social engineering attacks**.

- Led remote teams, coordinated project delivery, and maintained client communication and documentation.

AI Assistant Development – EvoTech

- Designed and built an **AI-powered assistant** to support business operations and technical workflows.
- Integrated automation concepts to improve efficiency and service delivery.

Hands-On Cybersecurity Practice

- Regularly perform penetration testing labs, web vulnerability discovery, OSINT investigations, phishing simulations, and network traffic analysis.
 - Continuous self-driven learning through virtual environments, labs, and security research.
-

Languages

- **Arabic:** Native
 - **English:** Fluent (professional working language)
 - **Spanish:** Beginner
-

Soft Skills & Strengths

- Strong **self-learning and research mindset**, continuously pursuing certifications, labs, and hands-on experience.
 - **Entrepreneurial leadership** gained from founding and managing EvoTech.
 - Effective communication skills with strong awareness of **human factors and social engineering risks**.
 - Consistent documentation, organization, and progress tracking to support long-term cybersecurity growth.
-

Career Objective

Seeking entry-level opportunities in **Cybersecurity Engineering, Security Analysis, SOC Operations, or offensive security**—aligned roles, where strong technical foundations, hands-on lab experience, and a proactive learning mindset can contribute to improving organizational security posture.
